HURON RIVER DRIVE WATER MAIN LINING PROJECT

---CONSTRUCTION TO START JULY 29, 2013---

As you are aware, over the past year Huron Township has experienced several water main breaks on Huron River Drive in Downtown New Boston. As a result Huron Township has contracted with Liquiforce to line the existing water main on Huron River Drive from the intersection of Hannan Road & Huron River Drive to south of Kass Street and north of the intersection to just south of Lorrina Dr. of New Boston Woods Subdivision.

As part of this project the existing water main will be closed off during the construction. A temporary above ground water main will be installed to service the businesses and residents in the area during the construction. The above ground water main will have service connections made to the outside spigot of each business and residence. If you do not have a spigot or a working spigot on the outside of your house or building, please contact the DPW Department. Also, since the temporary service will be back fed through the outside connection the existing water meter will need to be removed. Huron Township will use your past history water usage to bill for the period the meter is out of service.

We are working on a fast track schedule in the hopes to complete the work and have everyone back in service in time for the October 2013 Applefest weekend. **Work is anticipated to begin on this project the week of July 29, 2013 and continue until the beginning of October 2013.** Huron Township DPW personnel will need to enter your business or residence to remove the meter. In anticipation of this work, if there won't be anyone available to allow the DPW Water Staff in your home to remove the meters between the hours of 8:00 am-3:30 pm, we ask that you contact the DPW Department to set up an appointment. We estimate that it will take approximately ½ hour to complete the meter removal and tie in the new service.

We apologize in advance for any inconvenience this may cause. The new water main lining project should eliminate water main breaks from occurring in the foreseeable future. In the meantime if you have any questions, or need to set up an appointment, please contact to the DPW Water Department at 734-753-4466 extension 125 between the hours of 8:00am -4:00 pm.
